About Dr. William Emerson, PhD

In 2002, Dr. William Emerson, PhD, was invited by The Wellness Institute to train our highest level and advanced training group in diagnosing and treating shock and trauma. His training extended over a two-year period and was comprised of didactic material, clinical demonstration, and experiential practice.

Everyone in the group of twenty professionals (psychologists, social workers and counselors) recognized the high caliber and unique quality of the training that Dr. Emerson provided. All of our practitioners, including myself and my Wellness Co-Founder, continue to use his unique and evidence-based approaches in our clinical practices. It's propelled our success rates beyond what anyone imagined, so much so that with his sanction, we published a book inspired by his trainings.

Dr. Emerson has been a clinical mentor to us and to thousands in our network of mental health professionals around the world. We recognize Dr. Emerson as the eminent pioneer in the field of Pre- and Perinatal Psychology and Treatment. He is also an exceptional and humane person, a skilled trauma clinician, an inspired spiritual seeker, and a gifted teacher. We cannot recommend Dr. Emerson highly enough.

Respectfully,

David Hartman, LCSW

Director, The Wellness Institute

President, The Wellness Graduate School of Psychology
